ABSTRACT OF THE DISCLOSURE

An apparatus for the gravimetric calibration of multi-channel pipettes
contains a balance that has a load receiver configured to support receptacles
containing a substance to be weighed. The apparatus has a holder device to support a
certain number of the receptacles into which a test liquid is dispensed from the multi-
channel pipette. The apparatus further has a transport device for advancing the
holder device towards the load receiver. The receptacles are seated in the holder
device at equally spaced positions and are one by one delivered to and subsequently
removed from the measuring device.
